This book is an in-depth, systematic and structured technical reference on 3GPP's LTE-Advanced (or LTE-Release 10 and beyond), covering theory, technologies and implementation, written by an author who has been involved in the inception and development of these technologies for nearly 20 years. The book not only describes the operation of individual components but also shows how they fit into the system and operate from a systems perspective. Uniquely, this book gives in-depth information on upper protocol layers, implementation and deployment issues, and services, making it very suitable for engineers who are implementing the technology into future products and services. A description of the whole system from a top-down perspective - to give an understanding of how the whole system works - together with detailed algorithmic descriptions of the individual components' operation. Strong emphasis on implementation and deployment scenarios, making this a very practical book. Covers all the essential system functionalities, features, and their inter-operation based on a clear protocol structure. Covers fully the latest Release 11. Clear and concise descriptions of the underlying principles to better understand the operation of the system's components. Gives understanding and insight into the advanced technologies underlying LTE-Advanced: multi-antenna signal processing, over-the-air transmission methods, extremely high data rates over broadband wireless channels, real-time and non-real-time wireless multimedia technologies in high-mobility wireless applications. Comparison of IEEE 802.16e/m, 3GPP HSPA+ with 3GPP LTE/LTE Advanced, showing similarities and differences. Includes topics that are being considered for mobile systems beyond IMT-Advanced: cooperative communications, cloud communications, cloud services, green RAN, cognitive Radios, and software defined radio.

Multidimensional Signal, Image, and Video Processing and Coding, John William Woods, 2012, Computers, 595 pages. This fully revised and expanded edition gives readers the necessary understanding of image and video processing concepts to contribute to this hot technology's future advances.

Estimation Techniques for Lte Downlink, Waqas Aslam Cheema, Asad Mehmood, 2010, 96 pages. The focus of this book is to evaluate the channel estimation and equalization for OFDM based LTE downlink according to 3GPP specifications. This book presents a link level.

Asymptotic Analysis, Volume 48, James Dickson Murray, 1984, Approximation theory, 164 pages. From the
reviews: "A good introduction to a subject important for its capacity to circumvent theoretical and practical
obstacles, and therefore particularly prized in the.

LTE for 4G Mobile Broadband Air Interface Technologies and Performance, Farooq Khan, Mar 26, 2009,
Computers, 492 pages. Understand the new technologies of the LTE standard and their impact on system
performance improvements with this practical guide.

Evaluation of LTE-Advanced Networks, Adnan Quaium, 2012, 140 pages. As a next-generation 3GPP
standard, LTE-Advanced exclusively takes the relay technology into account. This book focuses the relay
technologies for the LTE-Advanced systems and.

Carrier Aggregation Technique for Improving LTE-Advanced System, Aws Zuheer Yonis, Yonis Aws Zuheer,
Abdullah Mohammad Faiz Liew, Mohammad Faiz Liew Abdullah, Jan 1, 2013, Technology & Engineering,
140 pages. Long Term Evolution-Advanced (LTE-A) significantly enhances the existing LTE Release 8 and
supports much higher peak rates, higher throughput, and lower latencies resulting in.

LTE Air Interface Protocols, Mohammad T. Kawser, 2011, Computers, 442 pages. Developed by the Third
Generation Partnership Project, long term evolution (LTE) is an important new 4G wireless broadband
technology that provides significantly increased peak.

LTE Advanced - Physical Layer Improvements, Vincenzo Malta, 2011, 108 pages. Orthogonal Frequency
Division Modulation (OFDM) is the modulation employed by the LTE downlink physical layer. Recent
studies on pilot-aided channel estimation, show that.

Neron Models, Siegfried Bosch, Werner Lütkebohmert, Michel Raynaud, Apr 2, 1990, Mathematics, 325 pages. Néron models were invented by A. Néron in the early 1960s in order to study the integral structure of abelian varieties over number fields. Since then, arithemeticians and. The building envelope applications of new technology cladding, Alan Brookes, Chris Grech, 1990, House & Home, 132 pages. This is unique handbook represents a state-of-the-art collection of seminal articles on research procedures. It was expertly assembled by the author -- a former editor of the. By using an issues-oriented approach, Volume 1 -- Cell Biology and Genetics from The Unity and Diversity of Life, 12e grabs student interest with real-life issues that hit home.
